SUCCESS STORY

Client Name: TechnoTrak Engineers

Project : SAP Business One Implementation

Company Profile:

Techno Trak engineers is an engineering industry started in 1990 in industrial belt of Ahmednagar city, near to industrial capital of India, Pune. It is promoted by technocrats who are engineering graduates and post graduates in management. Both the promoters have wide experience in corporate sector at various levels. Our organization has set a vision to become one of the front runners in the manufacturing and supply of the engineering goods in our product line from India. In our drive to attain this goal, we continually put in effort and hard work to usher in innovative changes to our products and make them useful and beneficial even in the light of technological advance. We also ascertain the quality of our products to international standards which are used in various critical engineering applications.

Business Challenge:

- To eliminate manual and time-consuming procedures and establish standardized business processes, systems and management practices
- To achieve better deployment of resources and increase productivity across plants.

Customer Testimonials

We had heard several stories about failing SAP projects, during our product selection process. CFIC team gave us the complete picture and cleared our myths, which convinced us on investing in SAP Business One. We were proven right in our decision, as CFIC team handled the engagement very professionally and delivered us the right solution, in time and within budget..**Arun Kulkarni-Owner and MD-TechnoTrak Engineers.**
